Diane Koach

Dear BUSD School Employees,

We would like to inform you that an Integrated Pest Management (IPM) approach for controlling insects, rodents, and weeds will be used at Bonita Unified School District. The IPM approach we will be using focuses on making the school buildings and grounds an unfavorable place for pests to live and breed. Through maintenance and cleaning, we will reduce or eliminate available food and water sources, and hiding places for the pests. We will also routinely monitor the school area to detect pest problems and prevent the pests from becoming established. Some IPM techniques we will employ include monitoring, increased sanitation, sealing entry points, physically removing the pest, and modifying storage practices.

The Healthy Schools Act requires all California school districts to notify employees of pesticides they expect to apply during the year. We expect to use the following pesticides this year:

Bayer Deltadust insecticide, Bayer Finale herbicide, Bayer Premise 2 insecticide, Bayer Premise Foam for termites, EcoPCO aerosol unscented insecticide, EcoPCO AR-X aerosol insecticide, NiBan-FG silverfish solution, Onslaught insecticide, Speed Zone herbicide for turf, Sygenta Advion cockroach gel bait, Syngenta Advion fire ant bait, Victor Pro Poison Free Flushing and contact killer, and Hot Shot Roach Powder

In addition, the Bonita Unified School district periodically contracts with Janus Pest Control for bee management. You can find more information regarding these pesticides and pesticide use reduction at the Department of Pesticide Regulation's Web site at www.cdpr.ca.gov.

You may view a copy of the district's integrated pest management plan in any school office. It is also located online at: <http://do.bonita.k12.ca.us/documents/Facilities/IntegratedPestManagementPlan.pdf>

If you have any questions, please contact Mr. Robb Harrison at (909) 971-8320.

Additionally, employees may request prior notification of individual pesticide applications at the respective school site or department. People listed on this registry will be notified at least 72 hours before pesticides are applied. Exempt pesticide applications do not require individual notifications. If a chemical application must be made to control an emergency pest problem, notice will be provided as soon as possible after the application

If you would like to be notified every time we apply a pesticide at your work location, please complete and return the form to your school site administrator.

Request for Individual Pesticide Application Notification

I understand that, upon request, the school district is required to supply information about individual pesticide applications at least 72 hours before application. I would like to be notified before each pesticide application at my work location. Exempt pesticide applications do not require individual notifications. If a chemical application must be made to control an emergency pest problem, notice will be provided as soon as possible after the application

Please return to your immediate supervisor.
